I am asking that you reject the NAB's petition 04-160. I pay for and enjoy XM Radio's services, including the very best of news and music. In fact, I have migrated to XM Radio because there is no local classical music on the air in the Detroit market. There is no classical station because our public airwave broadcasters could not find a way to make enough money from classical radio. Again, I pay for XM Radio, and I do not believe XM Radio should be denied the right to broadcast anything that is within the bounds of acceptable broadcast content. Certainly, they should not be prevented from broadcasting traffic and weather.

I cannot believe that the FCC, with a mandate to protect the interests of the viewer and listener, could possibly entertain a petition that is designed specifically to limit competition.
